	Examiner CHARLIE PENG	Art Unit 2883	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I, Species A, drawn to an embodiment where two connection means are placed near the root of a blade as illustrated in Fig. 1;

Group I, Species B, drawn to an embodiment where a single connection means is integrated in a common housing as illustrated in Fig. 2;

Group II, Species C, drawn to an embodiment where two connection recesses are adapted to extend in different directions substantially perpendicular to each other as illustrated in Fig. 5;

Group II, Species D, drawn to an embodiment where two connection recesses are adapted to extend in different directions substantially opposite to each other as illustrated in Fig. 6;

Group III, Species E, drawn to an embodiment where each of three optical fibers 4 in three blades holds a loop and the three optical fibers are connected from blade to blade via connection means 5 as illustrated in Fig. 8;

Group III, Species F, drawn to an embodiment where three optical fibers 4 in three blades end in ends 27 as illustrated in Fig. 9.

Each of the two species in each group is mutually exclusive to the other species in the same group. Applicant is required, in reply to this action, to elect a single species from EACH of the three groups to which the claims shall be restricted if no generic claim is finally held to be

Art Unit: 2883

allowable, e.g. Species A, C and E from Groups I, II and III. That is, three species from three different groups should be elected. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. No claim is currently generic to all Groups and Species.
3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: although all groups share certain common features, the Examiner has determined these common features are disclosed by prior art (the details of which will become clear in a subsequently Office Action on merit) and therefore do not qualify as special technical features. Should the Examiner determine at a future time that claims are in a state where special technical features apply, the election requirement will be withdrawn and all claims will be examined on merits.
4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2883

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
